

ASML statement on updated US export restrictions

December 2, 2024

Veldhoven, the Netherlands

Today, the US authorities published an updated version of the advanced computing and semiconductor manufacturing equipment rule, imposing additional restrictions on suppliers for the export of chip manufacturing technology. These regulations will become effective immediately with a delayed compliance date of December 31, 2024 for some of the changes.

We are currently assessing the potential implications of the new regulations for ASML.

Long-term, our scenarios for demand in the semiconductor industry are not expected to be impacted by the new regulations, as these scenarios are based on the global demand for wafers rather than on any specific geographic split.

Forward Looking Statements

This announcement contains forward looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including statements relating to the export control regulations described herein and the expected impact of the new regulations on our long-term demand scenarios and other non-historical matters. These statements are based on current expectations, and you should not place undue reliance on them. Forward-looking statements do not guarantee future performance and involve risks and uncertainties, including risks related to the new regulations and impact on us and our results and ultimate impact on ASML, including our business, backlog and results, our ability to ship to customers and other risks indicated in the risk factors included in ASML's most recent Annual Report on Form 20-F and other filings with the US Securities and Exchange Commission. These forward-looking statements are made only as of the date of this document. We do not undertake to update or revise the forward-looking statements, whether as a result of new information, future events or otherwise.
